

Code-Layout, Readability and Reusability

FitBuddy – AI Fitness Plan Generator
Naan Mudhalvan Project | FastAPI + Google Gemini + SQLite

Aliya S (Team Leader), Prithika S, Sujithra P, Supriya V

Project organization

The code separates entry point (main.py), routes (routes.py), database (database.py), schemas (schemas.py), Gemini generators and HTML templates instead of using one file.

Readability

Clear file names, logical modules and beginner-friendly structure make the code easy to understand.

Reusability

Generator functions and database helpers are reused by both the HTML routes and the JSON API routes.
