

Coding & Solution

FitBuddy – AI Fitness Plan Generator
Naan Mudhalvan Project | FastAPI + Google Gemini + SQLite

Aliya S (Team Leader), Prithika S, Sujithra P, Supriya V

Implementation

FitBuddy is a Python web application built with FastAPI, with Jinja2 HTML pages and a Gemini-powered service layer.

Major modules

- Workout plan generation (Gemini 1.5 Pro)
- Nutrition / recovery tip (Gemini 1.5 Flash)
- Feedback-based plan revision (Gemini 1.5 Pro)
- Database storage (SQLAlchemy + SQLite)
- Admin dashboard

AI integration

User goal and intensity are converted into prompts, and the generated response is returned to the application for display and storage.

Security note

The API key is configured through the .env file and should not be committed to GitHub.
