

Performance Testing

FitBuddy – AI Fitness Plan Generator
Naan Mudhalvan Project | FastAPI + Google Gemini + SQLite

Aliya S (Team Leader), Prithika S, Sujithra P, Supriya V

Test approach

The team tested the local application by running the FastAPI server with Uvicorn and checking the main pages, workout requests, generated results and feedback flow.

Checks covered

- Application starts successfully
- Input page loads
- Request reaches the backend
- AI-generated workout plan is returned when the service is available
- Result page renders correctly
- Feedback updates the plan
- Admin dashboard and /docs open

Environment

Testing was performed in the local Windows development environment. AI response time can vary because it depends on the Gemini service.
